SELECTED PROJECTS

ORGANVM Documentation Governance — 810K+ Words Across 113 Repositories
Designed contextmd auto-generation system producing CLAUDE.md, GEMINI.md, and AGENTS.md from Jinja2 templates bound to live registry data. Variable binding propagates metrics (repo count, test totals, organ membership) into every context file without manual edits. 100% coverage across all active repositories. Docs treated as a typed, validated data contract.

Portfolio — 20 Case Studies with Structured Content Architecture
Astro 5 static site with 20 project case studies, Pagefind full-text search, generative p5.js visual layer, and D3.js data visualizations. Each case study follows a consistent schema — problem, approach, evidence, outcome. CI/CD with quality ratchet governance. GitHub Pages deployment.

Application Pipeline — Content Composition Engine
Python CLI suite with modular framing blocks, resume variants, and cover letter components composed from structured YAML and Markdown. 2,078 tracked applications. 8-dimension scoring rubric, campaign orchestrator, and submission preflight — all driven by documentation-first design.

praxis-perpetua — Process Governance Corpus
Docs-only repository of SOPs, session self-critique logs, derived principles, and templates for the eight-organ system. 6 SOPs, 5 templates, ongoing session log archive. Markdown-validated in CI. Captures institutional knowledge as structured, versioned documentation rather than implicit team convention.

organvm-corpvs-testamentvm — Planning & Governance Corpus
404K+ words of system documentation: architecture plans, sprint retrospectives, governance rules, validation scripts, and the 2,240-line registry-v2.json source of truth. All prose validated against JSON Schema. Living document synchronized with system state via automated metrics propagation.

EXPERIENCE

Documentation Architect & Technical Writer — 2020 — Present

- **Documentation Governance:** Designed context file architecture (CLAUDE.md/GEMINI.md/AGENTS.md) auto-generated across 113 repositories from templates and registry data — zero manual sync required.
- **Variable Binding System:** Metrics (code files, test counts, repo totals) propagate live into all documentation via a Python binding layer; documentation is always current.
- **Content Architecture:** 810K+ words structured across corpus docs, SOPs, session logs, essays, and auto-generated context files — all versioned in git, validated in CI.
- **Information Design:** JSON Schema → Jinja2 templates → Markdown output pipeline; every doc format has a typed contract and automated validation step.

Instructor — Composition & Writing — 2015 — Present

Miami Dade College, Keiser University, Nova Southeastern, FAU, Young Harris, Tarrant County, Broward, Palm Beach State

- 11 years college instruction — 100+ courses in composition, rhetoric, and writing across 8 institutions; 2,000+ students. Teaching writing at scale is the same discipline as documentation architecture: clarity, structure, audience awareness.

Digital Marketing Manager — 2023 — 2024

Miami Dade College Foundation (nonprofit)

- Rebuilt foundation website; designed content campaigns increasing donor engagement by 32%.

Multimedia Specialist — 2011 — 2020

AJP Media Arts — clients incl. Boca Ballet Theatre, Forward Funding, Arts in Boca

- Video, audio, and visual campaigns for nonprofits and arts organizations; 17.5M+ views, $2M in fundraising.
