Anthony James Padavano

DATA PLATFORM ENGINEER & BACKEND SYSTEMS BUILDER

New York City | 561-602-7300 | padavano.anthony@gmail.com

LINKS

Portfolio · GitHub · agentic-titan · ORGANVM System

PROFILE

Sole architect of a 113-repository data infrastructure system across 8 GitHub organizations: 82K files, 23,470 tests, 104 CI/CD pipelines, 50 validated dependency edges. Built registry-v2.json — a 2,240-line single source of truth tracking every repo's status, schema, lineage, and organ membership — functioning as a production data catalog with JSON Schema validation and automated consistency gates. Python-first backend developer. Full-Stack Developer (Meta).

TECHNICAL SKILLS

Python · Go · SQL · YAML/JSON Schema · Data Pipelines · Data Catalogs · Schema Validation · GitHub Actions · CI/CD · Docker · Airflow (familiar) · Kafka (familiar) · pytest · ruff · TypeScript · Node.js · CLI Tooling · GCP / Terraform · Redis · Nginx · Zod · Vitest · Astro · pnpm Monorepos

SELECTED PROJECTS

registry-v2.json — 113-Repo Data Catalog & Single Source of Truth
2,240-line JSON registry tracking every repository's organ membership, implementation status, dependency declarations, and promotion state. JSON Schema validated in CI. Python scripts enforce referential integrity, lineage, and zero circular-dependency invariants across 50 validated edges. Functions as a hand-built data catalog at small-team scale.

ORGANVM Eight-Organ System — Automated Data Pipeline Infrastructure
8 GitHub organizations, 82K files, 23,470 tests, 104 CI/CD pipelines. Python batch processing pipeline transforms raw YAML state files into enriched analytics: scoring rubric execution, campaign orchestration, funnel reporting, snapshot trend analysis, and inter-rater agreement computation. 50 dependency edges with zero back-edge violations enforced by weekly validation.

Application Pipeline — Python Data Processing Suite
30+ Python CLI scripts sharing a common library: YAML schema validation, batch enrichment, TF-IDF text matching, multi-dimension scoring engine, conversion funnel analytics, velocity tracking, and Greenhouse API integration. State machine enforces forward-only status transitions with automated triage. ~1,977 pytest tests.

agentic-titan — Multi-Agent Orchestration Framework
TypeScript multi-agent framework with 18 development phases and 1,095+ tests. Agent coordination, task decomposition, and parallel execution. Structured for extensibility and production reliability.

Portfolio — Astro 5 Static Site with Data Visualizations
D3.js data visualizations, generative p5.js visual layer, Pagefind search, 20 case studies. CI/CD with quality ratchet governance and automated deployment gates.

EXPERIENCE

Backend & Data Platform Engineer — 2020 — Present

- **Data Catalog & Registry:** Built and maintains registry-v2.json — 2,240-line single source of truth for 113 repositories with JSON Schema validation, lineage tracking, referential integrity enforcement, and automated consistency gates in CI.
- **Data Pipeline Architecture:** Python batch-processing pipelines for scoring, enrichment, funnel analytics, trend snapshots, and external API ingestion (BLS OES, GitHub, Remotive); all pipelines share a common library with explicit schema contracts.
- **Schema Validation & Data Quality:** YAML/JSON schema validation CI gates across 113 repos; automated staleness detection, data lineage checks, and promotion state machine enforcing zero invalid state transitions across the entire corpus.
- **CI/CD Infrastructure:** 128 GitHub Actions workflows (18 reusable templates), 104 pipelines enforcing lint, test, validate, and deploy gates across 8 GitHub organizations.

Instructor — Composition & Technical Communication — 2015 — Present

Miami Dade College, Keiser University, Nova Southeastern, FAU, Young Harris, Tarrant County, Broward, Palm Beach State

- 100+ courses across 8 institutions; 2,000+ students. Clear technical communication, documentation, and structured information delivery at scale.

Digital Marketing Manager — 2023 — 2024

Miami Dade College Foundation (nonprofit)

- Rebuilt foundation website; designed data-driven campaigns increasing donor engagement by 32%.

Multimedia Specialist — 2011 — 2020

AJP Media Arts — clients incl. Boca Ballet Theatre, Forward Funding, Arts in Boca

- Video, audio, and visual campaigns for nonprofits and arts organizations; 17.5M+ views, $2M in fundraising.

EDUCATION

M.F.A. Creative Writing, Florida Atlantic University — 2015 — 2018
B.A. English Literature, CUNY College of Staten Island — 2010 — 2014
