SELECTED PROJECTS

ORGANVM Eight-Organ System — 739K-Word Knowledge Infrastructure
113 repositories, 82K files, 739K words of structured documentation: CLAUDE.md governance in every repo, cross-org dependency rules, registry-v2.json as single source of truth for 97+ repos. 94 CI/CD pipelines ensuring documentation integrity on every push. TypeScript + Python.

Portfolio — Astro 5 Documentation Platform with Full-Text Search
Pagefind full-text search across 739K words, 20 structured case studies, D3.js visualizations, generative art layer. Quality-ratchet governance: committed JSON policy asserting README values match policy — documentation as immutable contract.

Application Pipeline — Workflow Orchestration for Non-Technical Operators
Python CLI suite enabling complex multi-step workflows through single-word commands: 79 commands, YAML state machine, 9-dimension scoring, campaign orchestrator. Built so non-engineers can execute advanced pipeline operations with confidence.

agent--claude-smith — Claude Agent SDK Documentation Agent
TypeScript agent on Claude Agent SDK: session persistence, self-correction, MCP protocol, structured tool invocation. Automates documentation generation and knowledge-graph maintenance across distributed repositories.

agentic-titan — Multi-Agent Orchestration System
TypeScript multi-agent framework: 18 development phases, 1,276 tests. Task decomposition and parallel execution for large-scale knowledge system operations requiring coordinated agent workflows.

EXPERIENCE

Independent Software Engineer & Documentation Systems Architect — 2020 — Present

- **Teaching Complex Systems:** 100+ courses, 2,000+ students across 8 institutions — proven ability to translate intricate technical systems into customer-understandable frameworks, the core skill of solutions engineering.
- **CI/CD & Quality Governance:** 128 GitHub Actions workflows (18 reusable templates), 94 CI/CD pipelines, quality-ratchet governance with committed JSON policies enforcing documentation integrity on every push.
