Portfolio · GitHub · agentic-titan · ORGANVM System

PROFILE

Reliability-focused software engineer who built a 113-repository ecosystem governed by self-healing state machines and automated coherence audits. Sole architect across 8 GitHub organizations — 82K files, 23,470 tests, 104 CI/CD pipelines — with cross-repo guardrails ensuring zero-drift consistency at scale. Practitioner of an AI-conductor methodology: human intelligence directing AI-generated volume through structured validation gates. Full-Stack Developer (Meta). 18 years professional experience. LGBTQ+.

TECHNICAL SKILLS

TypeScript · Python · Node.js · Docker · Redis · Nginx · CI/CD · GitHub Actions · Observability · State Machines · Vitest · pytest · CLI Tooling · Git · Claude Agent SDK · Zod · YAML/JSON Schema · Express · WebSocket · GCP / Terraform · pnpm Monorepos · React 18

SELECTED PROJECTS

auto-revision-epistemic-engine — Self-Healing Coherence Auditor
Automated system for detecting and fixing regressions in cross-repository coherence. Ensures audit trails remain consistent across 113 repos, flagging drift before it propagates to dependent services.

alchemia-ingestvm — Cross-Org Observability Engine
High-throughput ingestion pipeline providing daily health monitoring and signal validation across 8 GitHub organizations. Detects degraded states, tracks cross-repo dependency health, and surfaces actionable alerts via structured observability dashboards.

call-function-ontological — Formal Validation Framework
Ontological layer for structured function invocation with typed schemas and validation gates. Ensures input correctness at the boundary before execution, preventing cascading failures in downstream systems.

alchemical-synthesizer — Signal-Flow Reliability Architecture
Compositional system managing complex non-deterministic logic flows. Maintains truthful state models even under partial failures, with fallback routing and degraded-mode operation for upstream dependency outages.

ai-chat-exporter — Developer Workflow Reliability Tooling
CLI tool for exporting AI chat sessions into structured development artifacts with schema validation and reproducible output formats. Eliminates manual transcription toil in AI-assisted development workflows.

EXPERIENCE

Software Engineer & Reliability Systems Builder — 2020 — Present
ORGANVM

- **Reliability Engineering:** 23,470 tests and 104 CI/CD pipelines ensuring cross-organization coherence.
- **CI/CD Infrastructure:** 128 GitHub Actions workflows (18 reusable templates) with promotion state machine enforcing LOCAL → CANDIDATE → PUBLIC → GRADUATED deployment gates across all repositories.
- **Observability & Verification:** Monorepo-scale health monitoring with signal validation gates, URL liveness checks, staleness detection, and automated incident alerting across all services.
- **Developer Tooling:** 37-script Python CLI suite (700+ tests) with schema validation, API integrations, and batch processing that reduces operational toil and prevents regressions before deployment.

Instructor — Composition & Writing — 2015 — Present
Miami Dade College, Keiser University, Nova Southeastern, FAU, Young Harris, Tarrant County, Broward, Palm Beach State

- 100+ courses across 8 institutions; 2,000+ students. Systematic feedback methodology, technical communication, and cross-team mentoring that scaled knowledge transfer across diverse cohorts.

Digital Marketing Manager — 2023 — 2024
Miami Dade College Foundation (nonprofit)

- Rebuilt foundation website with reliability-focused architecture; designed data-driven fundraising campaigns increasing donor engagement by 32%.

Multimedia Specialist — 2011 — 2020
AJP Media Arts — clients incl. Boca Ballet Theatre, Forward Funding, Arts in Boca

- Video, audio, and visual production pipelines for nonprofits and arts organizations; 17.5M+ views, $2M in fundraising.

EDUCATION

M.F.A. Creative Writing, Florida Atlantic University — 2015 — 2018
B.A. English Literature, CUNY College of Staten Island — 2010 — 2014
