PROFILE

Platform architect obsessed with reducing friction in the software development lifecycle. Architect of ORGANVM, a 113-repository system coordinated through automated governance, 104 self-healing CI/CD pipelines, and ~766K+ words of documentation. Expert in building automated guardrails, CLI developer tools, and modularized agent capability frameworks that allow engineering at frontier scale to remain secure and delightful. Driven by the philosophy that the process of creation, made visible and governable, is the ultimate engineering product.

TECHNICAL SKILLS

Python · TypeScript · Rust · Go · CLI Tooling · CI/CD · GitHub Actions · Docker · Nix · Bazel · API Orchestration · YAML/JSON Schema · Zod · pytest · ruff · Claude Agent SDK · Node.js · Git · GCP / Terraform · Documentation-as-Code

SELECTED PROJECTS

Application Pipeline — 37-Script CLI Tooling Suite
Python CLI suite for career state management. Implements native Greenhouse/Ashby API clients, 8-dimension scoring rubric, and "audit-first" submission tracking with 700+ tests on real data. Reduces multi-platform friction to zero.

ai-skills — Modular Agent Capability Framework
Standardized framework for AI assistant interaction with internal tools. Implements a formal registry of "skills" with typed inputs and validation gates, turning speculative AI engineering into a governable process.

alchemia-ingestvm — High-Throughput Ingestion Engine
Designed for monorepo-scale visibility. Provides daily health monitoring and signal validation required to maintain coherence across 113 repos. Self-healing system ensuring observability-by-default for a single operator.

system-governance-framework — Auditable State Machine
Formal state machine governing 113 repositories. Enforces status transitions (LOCAL → CANDIDATE → PUBLIC → GRADUATED) with automated dependency validation and zero-violation enforcement.

agentic-titan — Multi-Agent Orchestration Framework
TypeScript framework for autonomous task decomposition and parallel execution. Features session persistence and self-correction hooks with 1,095+ tests across 18 development phases.

EXPERIENCE

Staff+ Software Engineer & Platform Architect — 2020 — Present
ORGANVM

- **Platform Orchestration:** Designed 113-repository system with automated governance and 104 self-healing CI/CD pipelines; maintained 100% documentation coverage across 8 organizations.
- **Developer Tooling:** Built 37 Python CLI tools for lifecycle automation, including native API clients for Greenhouse/Ashby and schema-based validation for all system entities.
- **AI Integration:** Developed ai-skills framework for standardized agent tool-use and agentic-titan for multi-agent coordination; 23,470 tests in flagship repositories.
- **Friction Reduction:** Engineered automated guardrails and ingestion engines (alchemia-ingestvm) that enable a single practitioner to operate with the coherence of a full engineering team.

EDUCATION

M.F.A. Creative Writing, Florida Atlantic University — 2015 — 2018
B.A. English Literature, CUNY College of Staten Island — 2010 — 2014
