PROFILE	Software engineer building client-side infrastructure, CLI tooling, and local service layers in TypeScript and Python. Creator and sole architect of a 103-repository system across 8 GitHub organizations — including MCP servers running as persistent local services via LaunchAgent, a 14-script Python CLI pipeline with API integrations and YAML state machines, and a multi-agent orchestration framework with 1,095 tests. 21K code files, 3.6K tests, 94 CI/CD pipelines, governed by CLAUDE.md files and 32 AI agent definitions. Full-Stack Developer (Meta). 18 years professional experience. MFA Creative Writing. 11 years college instruction, 2,000+ students. LGBTQ+.

SELECTED PROJECTS	Application Pipeline — CLI Tooling Suite Python CLI client infrastructure: 14 independent scripts sharing a common library, YAML pipeline state machine, Greenhouse and Ashby API clients, 8-dimension scoring rubric, campaign orchestrator, submission preflight, batch enrichment, velocity tracking. End-to-end orchestration from research through identity mapping, content synthesis, and portal submission.	
	MCP Server Infrastructure — Local Service Layer Node.js client-side service layer providing filesystem access, persistent memory, and sequential reasoning to AI development tools. Runs as a macOS LaunchAgent, exposes health-check endpoints, mediates between local state and remote services. Structured logging and unsupervised reliability.	
	agentic-titan — Multi-Agent Orchestration System TypeScript multi-agent framework: 18 development phases, 1,276 tests. Agent coordination, task decomposition, structured tool invocation, and parallel execution patterns. Client-side orchestration designed for extensibility and reliability.	
	agent--claude-smith — Claude Agent SDK Integration TypeScript agent built on Claude Agent SDK with session persistence, self-correction hooks, and structured tool invocation. Designed for autonomous multi-step software engineering tasks running on the developer's machine.	
	ORGANVM Eight-Organ System — 103-Repository Developer Infrastructure 8 GitHub organizations, 21K code files, 3.6K tests, 94 CI/CD pipelines. CLAUDE.md governance in every repo. 128 GitHub Actions workflows (18 reusable templates). Automated dependency validation, promotion state machine (LOCAL → CANDIDATE → PUBLIC → GRADUATED), cross-org coordination. TypeScript + Python.
