SELECTED PROJECTS

ORGANVM Eight-Organ System — 103-Repository Open-Source Infrastructure
8 GitHub organizations, 21K code files, 3.6K tests, 94 CI/CD pipelines. Every repository includes a CLAUDE.md governance file with onboarding instructions, architecture decisions, and navigation protocols — 810K+ words of structured documentation total. 42 published essays (142K words) documenting the build process as real-time technical writing. 128 GitHub Actions workflows (18 reusable templates). Machine-readable registry with 43 validated dependency edges. 100% public, 100% documented. TypeScript + Python.

Portfolio — Astro 5 Developer Portfolio
20 case studies with technical deep-dives, generative p5.js visual layer, D3.js data visualizations, Pagefind full-text search. CI/CD with quality ratchet governance. Demonstrates technical content creation: each case study documents architecture decisions, trade-offs, and implementation details for a developer audience.

agentic-titan — Multi-Agent Orchestration System
TypeScript multi-agent framework: 18 development phases, 1,276 tests. Fully documented agent coordination patterns, task decomposition, and parallel execution. Structured for extensibility with comprehensive README and contributor-facing documentation.

Application Pipeline — CLI Tooling Suite
Python CLI tools: Greenhouse API client, 8-dimension scoring rubric, campaign orchestrator, YAML pipeline state machine, submission preflight, batch enrichment, velocity tracking. 14 independent scripts sharing a common library with full docstrings and usage documentation.

agent--claude-smith — Claude Agent SDK Integration
TypeScript agent built on Claude Agent SDK with session persistence, self-correction hooks, and structured tool invocation. Documented integration patterns for autonomous multi-step software engineering tasks.
