PROFILE

Backend engineer specializing in state machines, validation systems, and transaction correctness. Sole architect of a 113-repository system across 8 GitHub organizations — 23,470 tests, 104 CI/CD pipelines, 50 dependency edges, schema-governed YAML state machines with explicit transition rules and audit trails. Builds Python CLI tooling and pipeline orchestration with emphasis on correctness over speed. Full-Stack Developer (Meta). MFA, Creative Writing.

TECHNICAL SKILLS

Python · State Machines · YAML/JSON Schema · pytest · ruff · CLI Tooling · GitHub Actions · CI/CD · Docker · TypeScript · Node.js · Zod · Vitest · Express · Redis · WebSocket · Git · GCP / Terraform · Nginx · pnpm Monorepos · IMAP / Email APIs · Greenhouse API · Validation Pipelines

SELECTED PROJECTS

Application Pipeline — Financial-Grade State Machine & Validation Suite
Python YAML pipeline with 9-state machine (research → qualified → drafting → staged → submitted → interview → outcome), forward-only enforcement, schema validation, preflight gates, and full audit trail. 14 interdependent scripts sharing a common library with explicit error handling.

ORGANVM Eight-Organ System — 113-Repository Developer Infrastructure
8 GitHub organizations, 82K files, 23,470 tests, 104 CI/CD pipelines. Automated dependency validation with 50 cross-org dependency edges. Promotion state machine with strict forward-only transitions and governance contracts in every repo. TypeScript + Python.

agentic-titan — Multi-Agent Orchestration System
TypeScript multi-agent framework: 18 development phases, 1,276 tests. Structured task decomposition, parallel execution, and correctness-first agent coordination patterns designed for reliability under failure.

agent--claude-smith — Claude Agent SDK Integration
TypeScript agent built on Claude Agent SDK with session persistence, self-correction hooks, and structured tool invocation. Designed for autonomous multi-step software engineering tasks requiring durable state tracking.

Portfolio — Astro 5 Static Site with CI/CD Quality Governance
Generative p5.js visual layer, D3.js data visualizations, Pagefind search, 20 case studies. Quality ratchet governance: committed policy JSONs enforce assertions on every deploy.

EXPERIENCE

Backend Engineer & Systems Builder — 2020 — Present

- **State Machine Design:** Built 9-state YAML pipeline with forward-only transitions, deferred states, audit-logged events, and strict schema validation — designed for correctness over throughput.
- **Validation & Correctness:** Schema-enforced data contracts, preflight validation gates, multi-dimension scoring rubric, signal-action audit trail, and regression test suite covering state and schema changes.
- **Python Backend Tooling:** 14+ CLI scripts (scoring, enrichment, submission, campaign orchestration, Greenhouse API client), all importing from shared library; 23,470 tests across 113 repositories.
- **CI/CD Infrastructure:** 104 CI/CD pipelines, 128 GitHub Actions workflows (18 reusable templates), automated dependency validation enforcing 50 cross-org dependency edges.

Instructor — Composition & Writing — 2015 — Present

Miami Dade College, Keiser University, Nova Southeastern, FAU, Young Harris, Tarrant County, Broward, Palm Beach State

- 100+ courses across 8 institutions; 2,000+ students. Technical communication and documentation for complex systems.

Digital Marketing Manager — 2023 — 2024

Miami Dade College Foundation (nonprofit)

- Rebuilt foundation website; designed campaigns increasing donor engagement by 32%.

Multimedia Specialist — 2011 — 2020

AJP Media Arts — clients incl. Boca Ballet Theatre, Forward Funding, Arts in Boca

- Video, audio, and visual campaigns for nonprofits and arts organizations; 17.5M+ views, $2M in fundraising.

EDUCATION

M.F.A. Creative Writing, Florida Atlantic University — 2015 — 2018
B.A. English Literature, CUNY College of Staten Island — 2010 — 2014
