PROFILE

Engineer specializing in real-time infrastructure, multi-agent orchestration, and customer-facing technical integration. Sole architect of a 113-repository system across 8 GitHub organizations — WebSocket/Redis event-driven patterns, 23,470 tests, 104 CI/CD pipelines, 32 AI agent definitions. Builds forward-deployed systems that embed cleanly into existing infrastructure and leave teams with working integrations, not onboarding decks. Full-Stack Developer (Meta). MFA, Creative Writing.

SELECTED PROJECTS

agentic-titan — Multi-Agent Real-Time Orchestration System
TypeScript multi-agent framework: 18 development phases, 1,276 tests. Parallel agent execution, task decomposition, and real-time coordination patterns with WebSocket event dispatch. Built for reliability under concurrent, streaming workloads.

agent--claude-smith — Claude Agent SDK Integration
TypeScript agent with session persistence, self-correction hooks, and structured tool invocation over real-time event streams. Forward-deployed pattern: embeds AI capability into existing workflows with minimal configuration and explicit handoff documentation.

ORGANVM Eight-Organ System — 113-Repository Infrastructure with Event Pipelines
8 GitHub organizations, 82K files, 23,470 tests, 104 CI/CD pipelines. Redis-backed event queues, WebSocket coordination patterns, 32 AI agent definitions. Automated validation enforcing 50 cross-org dependency edges in real time. TypeScript + Python.

Application Pipeline — Real-Time Monitoring & Alert System
Python CLI suite with IMAP email monitoring, webhook dispatch (notify.py), signal-action audit trail, and LaunchAgent-scheduled real-time checks. Integrates external APIs (BLS, GitHub, Greenhouse) with deduplication and retry logic.

Portfolio — Astro 5 Static Site with Live Data Visualizations
Production Astro 5 site: generative p5.js canvas, D3.js real-time data visualizations, Pagefind search, 20 case studies. CI/CD quality governance with every deploy validated against committed policy contracts.
