SELECTED PROJECTS

ORGANVM Eight-Organ System — 113-Repository AI-Governed Infrastructure
8 GitHub organizations, 82K files, 23,470 tests, 104 CI/CD pipelines, 32 AI agent definitions. CLAUDE.md governance contracts in every repo. AI-conductor methodology: structured human review gates on all AI-generated output. TypeScript + Python.

agent--claude-smith — Claude Agent SDK Integration
TypeScript agent built on Claude Agent SDK with session persistence, self-correction hooks, and structured tool invocation. Demonstrates AI data quality control patterns: structured prompting, output validation, and self-correction loops.

agentic-titan — Multi-Agent Orchestration System
TypeScript multi-agent framework: 18 development phases, 1,276 tests. Agent coordination, task decomposition, and parallel execution. Designed to demonstrate structured AI workflow patterns for enterprise-scale data generation.

Application Pipeline — Data Governance & Scoring Suite
Python CLI tools with 9-dimension scoring rubric, schema validation, signal-action audit trail, multi-model IRA (inter-rater agreement) framework, and external validation cache. 14 scripts sharing a common library with explicit contract enforcement.

Portfolio — Astro 5 Site with 20 Technical Case Studies
20 case studies documenting AI-driven engineering work, generative art, and systems design. Pagefind full-text search, D3.js visualizations, quality ratchet governance. Built to communicate complex systems to non-technical audiences.
