PROFILE

Backend engineer building reliable Python APIs, state machines, and tested data pipelines at scale. Sole architect of a 113-repository system across 8 GitHub organizations — 23,470 tests, 104 CI/CD pipelines, schema-governed YAML state machines, and 50 cross-org dependency edges enforced automatically. Designed payment-adjacent transaction pipelines with forward-only state transitions, audit trails, and explicit error handling. Full-Stack Developer (Meta). MFA, Creative Writing.

TECHNICAL SKILLS

Python · State Machines · REST APIs · pytest · ruff · YAML/JSON Schema · CLI Tooling · GitHub Actions · CI/CD · Docker · Git · TypeScript · Node.js · Express · Zod · Redis · WebSocket · Nginx · GCP / Terraform · pnpm Monorepos · Vitest · Greenhouse API · IMAP / Email APIs

SELECTED PROJECTS

Application Pipeline — Transaction State Machine & API Suite
Python YAML pipeline: 9-state machine (research → staged → submitted → outcome) with forward-only enforcement, ATS API integrations (Greenhouse, Lever, Ashby), schema validation, preflight gates, and audit-logged signal-action trails. 14 CLI scripts sharing a common library.

ORGANVM Eight-Organ System — 113-Repository Backend Infrastructure
8 GitHub organizations, 82K files, 23,470 tests, 104 CI/CD pipelines. Automated dependency validation with 50 cross-org edges. Promotion state machine with forward-only transitions, schema contracts, and governance rules enforced at every stage. TypeScript + Python.

agentic-titan — Multi-Agent Orchestration System
TypeScript multi-agent framework: 18 development phases, 1,276 tests. Structured task decomposition, parallel execution, and correctness-first coordination designed for durability under concurrent load.

agent--claude-smith — Claude Agent SDK Integration
TypeScript agent built on Claude Agent SDK with session persistence, self-correction hooks, and structured tool invocation. Emphasizes correctness guarantees for autonomous multi-step workflows.

Portfolio — Astro 5 Static Site with Quality Governance
Generative p5.js visual layer, D3.js data visualizations, Pagefind search, 20 case studies. Quality ratchet governance: committed policy JSONs, CI assertions on every deploy, strict test gates.

EXPERIENCE

Backend Engineer & API Systems Builder — 2020 — Present

- **Python Backend & APIs:** ATS API integrations (Greenhouse, Lever, Ashby) using stdlib urllib; 14+ CLI tools with shared library; 23,470 tests; YAML schema validation; explicit error handling and fail-fast design.
- **State Machine Design:** 9-state pipeline with forward-only transitions, deferred states, audit trail, schema-enforced contracts, and preflight validation gates — same pattern as payment transaction lifecycle management.
- **Testing Discipline:** pytest suite covering state transitions, schema changes, API integration, and edge cases; two test styles (live-data + isolated with monkeypatch/tmp_path); ruff enforced in CI.
- **CI/CD Infrastructure:** 104 CI/CD pipelines, 128 GitHub Actions workflows (18 reusable templates), automated dependency validation across 8 GitHub organizations.

Instructor — Composition & Writing — 2015 — Present

Miami Dade College, Keiser University, Nova Southeastern, FAU, Young Harris, Tarrant County, Broward, Palm Beach State

- 100+ courses across 8 institutions; 2,000+ students. Clear technical communication and systematic documentation practices.

Digital Marketing Manager — 2023 — 2024

Miami Dade College Foundation (nonprofit)

- Rebuilt foundation website; designed campaigns increasing donor engagement by 32%.

Multimedia Specialist — 2011 — 2020

AJP Media Arts — clients incl. Boca Ballet Theatre, Forward Funding, Arts in Boca

- Video, audio, and visual campaigns for nonprofits and arts organizations; 17.5M+ views, $2M in fundraising.

EDUCATION

M.F.A. Creative Writing, Florida Atlantic University — 2015 — 2018
B.A. English Literature, CUNY College of Staten Island — 2010 — 2014
