PROFILE

Sole architect of a 113-repository system organized as a promotion state machine: LOCAL → CANDIDATE → PUBLIC_PROCESS → GRADUATED → ARCHIVED — 50 validated dependency edges, zero back-edge violations, enforced by automated weekly checks. Built workflow orchestration in Python and TypeScript at the scale of a small engineering team: 82K files, 23,470 tests, 104 CI/CD pipelines. All repos public on GitHub. Go experience across 22 languages. Full-Stack Developer (Meta).

TECHNICAL SKILLS

Go · Python · TypeScript · Distributed Systems · Workflow Orchestration · State Machines · GitHub Actions · CI/CD · Docker · Kubernetes (familiar) · AWS (familiar) · pytest · Vitest · ruff · YAML/JSON Schema · CLI Tooling · Node.js · Redis · Nginx · GCP / Terraform · Zod · pnpm Monorepos · ElasticSearch (familiar)

SELECTED PROJECTS

ORGANVM Promotion State Machine — Workflow Engine for 113 Repositories
Five-state workflow engine (LOCAL → CANDIDATE → PUBLIC_PROCESS → GRADUATED → ARCHIVED) governing all 113 repositories. 50 dependency edges validated weekly with zero circular-dependency violations. Forward-only state transitions enforced by Python CLI with structured validation. Registry-v2.json (2,240 lines) is the durable state store — analogous to Temporal's workflow history.

Application Pipeline — Durable Multi-Step Workflow Orchestration
Python CLI orchestration suite: campaign executor, advance state machine, preflight validation, batch enrichment, and outcome tracker — 30+ scripts sharing a library, ~1,977 pytest tests. Each entry progresses through a validated status DAG (research → qualified → drafting → staged → submitted → outcome). Deferred entries reactivate on condition, mirroring Temporal's timer/signal model.

agentic-titan — Multi-Agent Orchestration Framework
TypeScript framework for coordinating autonomous agents across 18 development phases with 1,095+ tests. Task decomposition, parallel execution, and structured retry patterns — equivalent to Temporal's activity/workflow separation applied to AI agent coordination.

ORGANVM Eight-Organ System — 113-Repository Open-Source Infrastructure
All 113 repositories are public on GitHub. 8 GitHub organizations, 82K files, 23,470 tests, 104 CI/CD pipelines. CLAUDE.md governance in every repo, 128 GitHub Actions workflows (18 reusable templates), cross-org dependency validation. TypeScript + Python.

agent--claude-smith — Autonomous Agent with Durable Execution
TypeScript agent on Claude Agent SDK with session persistence, self-correction hooks, and structured tool invocation. Designed for multi-step autonomous tasks that survive interruption — same reliability guarantee Temporal provides to application code.

EXPERIENCE

Distributed Systems & Workflow Orchestration Engineer — 2020 — Present

- **Workflow State Machines:** Designed and operates a five-state promotion workflow for 113 repositories with 50 dependency edges, forward-only transition enforcement, deferred reactivation on conditions, and zero circular-dependency violations — the same durability guarantees Temporal provides at the application layer.
- **Distributed Systems Architecture:** 8 GitHub organizations with validated cross-org dependency DAG; automated weekly integrity checks enforce unidirectional data flow with zero back-edges; promotion state machine coordinates long-running multi-step sequences reliably.
- **Open Source & Testing Discipline:** All 113 repos public on GitHub; 23,470 tests across the system (14.5K Python, 8.9K TypeScript); flagship projects at 1,095 tests (agentic-titan); 104 CI/CD pipelines with lint, test, validate, and deploy gates.
- **Concurrent Execution Patterns:** Multi-agent orchestration (agentic-titan), parallel batch processing pipelines, agent self-correction loops with structured tool invocation — built across Go, Python, and TypeScript in a 22-language system.

Instructor — Composition & Technical Communication — 2015 — Present

Miami Dade College, Keiser University, Nova Southeastern, FAU, Young Harris, Tarrant County, Broward, Palm Beach State

- 100+ courses across 8 institutions; 2,000+ students. Clear technical documentation, runbooks, and operational knowledge transfer — exactly what Temporal's open source team ships alongside every feature.

Digital Marketing Manager — 2023 — 2024

Miami Dade College Foundation (nonprofit)

- Rebuilt foundation website; designed campaigns increasing donor engagement by 32%.

Multimedia Specialist — 2011 — 2020

AJP Media Arts — clients incl. Boca Ballet Theatre, Forward Funding, Arts in Boca

- Video, audio, and visual campaigns for nonprofits and arts organizations; 17.5M+ views, $2M in fundraising.

EDUCATION

M.F.A. Creative Writing, Florida Atlantic University — 2015 — 2018

B.A. English Literature, CUNY College of Staten Island — 2010 — 2014
