PROFILE

Documentation-first engineer who built 810K+ words of structured technical writing as the governing infrastructure for a 103-repository system across 8 GitHub organizations — CLAUDE.md in every repo, seed.yaml contracts defining every dependency edge, cross-document reading orders, and an annotated manifest with per-file descriptions. Author of 42 published essays translating architectural decisions for non-technical audiences. Builder of CLI developer tools (Python, TypeScript), multi-agent orchestration systems (Claude Agent SDK, agentic-titan with 1,276 tests), and 94 CI/CD pipelines governed by YAML/JSON schemas. 11 years college instruction, 2,000+ students taught clear technical communication. Full-Stack Developer (Meta). 18 years professional experience. MFA Creative Writing. LGBTQ+.

SELECTED PROJECTS

ORGANVM Eight-Organ System — Documentation-Governed 103-Repository Infrastructure

810K+ words of structured documentation governing 8 GitHub organizations, 21K code files, 3.6K tests. CLAUDE.md in every repo defines contribution patterns, build commands, and architecture rationale. seed.yaml contracts declare dependency edges and event subscriptions. Cross-document reading order, annotated manifest with per-file descriptions, 42 published essays explaining architectural decisions. 128 GitHub Actions workflows (18 reusable templates). TypeScript + Python.

Application Pipeline — Developer CLI Tooling Suite

Python CLI tools with shared library foundation: 14 independent scripts, Greenhouse API client, 8-dimension scoring rubric, campaign orchestrator, YAML pipeline state machine, submission preflight, batch enrichment, velocity tracking. 191 tests. Every script documented with the "why," not just the "what."

agentic-titan — Multi-Agent Orchestration System

Multi-language framework (Python, Rust, TypeScript adapters): 18 development phases, 1,276 tests. Agent coordination, task decomposition, parallel execution, CLI interface, Redis-backed coordination — complex API surface requiring comprehensive documentation for usability.

Portfolio — Astro 5 Static Site

20 case studies documenting project architecture and decisions. Generative p5.js visual layer, D3.js data visualizations, Pagefind search. CI/CD with quality ratchet governance and policy-as-code validation.

agent--claude-smith — Claude Agent SDK Integration

TypeScript agent built on Claude Agent SDK with session persistence, self-correction hooks, and structured tool invocation. Designed for autonomous multi-step software engineering tasks.
